(Bradenton, Florida) – It's a technological twist on the pet door that combines convenience with security and safety – for pet owners and pets alike. Plexidor™ Pet Doors offers the Plexidor™ Electronic that opens exclusively for your pet via a wearable pass code “collar key”. It is like having a personalized garage door and electronic opener specifically for your dogs. And your dog is the only one with the electronic opener code.

The Plexidor™ Electronic is the latest product for the veteran Plexidor™ company, which has been in the pet door business for over 23 years. “Having a technological tool like this is great for the health and comfort of the pet too,” says Plexidor™ President Joe Ambrose. “It allows the pets to go outside when they have to, not when you are able to let them out. “ He adds, “For the pet owner, it is very helpful in preventing pet messes in the house from the pet having to hold it too long.”

How Does The Plexidor™ Electronic Pet Door Work?

“Collar keys” come programmed, simply clip it to the collar. The technology in the door reads and recognizes the code as the pet approaches the door and allows entrance. The pet door panel slides up and down like a mini-garage door.

The Plexidor™ collar key is actually an RFID chip. This leading-edge technology is passive, requires no batteries and allows you to have as many of your pets to use the door without ever have to worry about the neighbors' pets or wild animals coming in your pet door. The RFID tag is also waterproof, shockproof and very rugged.

The Plexidor™ Electronic Door itself is sturdy, rust-proof, energy efficient and does not blow open like most mud flap pet doors. The product is made with aluminum framing and high impact ABS panels, the same material used for football helmets. A safety mechanism prevents the door from closing while obstructed, preventing pinched tails, paws or fingers.

The Plexidor™ Electronic Pet Door comes in bronze and white, and various sizes to match all pets. The product line ranges in prices from \$129 to \$800 depending on size and model. They can be purchased direct or through dealers, and are also available at: www.dogdoors.com or by calling 800-749-9609.

Installers are positioned all over the United States and Canada.
